

INTERNATIONAL COLLOQUIUM
Application of Line Surge Arresters in Power Distribution
and Transmission Systems
Cavtat/Dubrovnik, Croatia, May 25 – 29, 2008

PAPERS:

1. L. Stenstrom, J. Taylor, N.T. Osipov, F. Persson:
Installation of LSA on a 400 kV Double-circuit Line in Russia
2. R. Shariatinasab, B. Vahidi, S. H. Hosseinian, A. Ametani:
Application of ANN and Genetic Algorithm for Evaluation the Optimum Location of Arresters on Power Networks due to the Switching Overvoltages
3. A. Xemard, J. Michaud, F. Maciela, T. Lassaigne, F. Sauvegrain, P. Auriol, J. G. Roumy, O. Saad, Q. Bui Van, A. Dutil:
Reduction of the number of double-circuit flashovers on a 400 kV overhead line
4. P. Prud'homme, A. Dutil:
Line surge arresters potential applications on Hydro-Quebec TransEnergie transmission system
5. D. Mišković, I. Uglešić:
Decreasing backflashover numbers on medium voltage overhead lines located in regions with high soil resistivity
6. I. M. Rawi, M. Pauzi Yahaya:
Pilot study on the use of gapless transmission line arresters (TLA) as an alternative to gapped TLA in TNB transmission system
7. I. Uglešić, V. Milardić, B. Filipović-Grčić, A. Tokić:
Evaluation of Energy Stress on Line Arresters
8. ZHANG Cui-xia, FAN Jian-bin, GE Dong, CHEN Xiu-juan:
Application of Line Surge Arresters in Power Transmission Line in China
9. M. G. Comber:
Application of gapless surge arresters for lightning protection of transmission and distribution lines
10. N. Yamada, M. Nakagami:
Basic Study on Deterioration of Transmission Line Arrester N.
11. M. Muhr, T. Sadović:
Real-time remote monitoring of line surge arresters
12. S. Sadović, D. Lepley, E. Brocard, J. M. George:
Line surge application on the compact transmission lines
13. F. Delfino, G. B. Denegri, P. Girdinio, M. Invernizzi, R. Procopio, M. Rossi, D. Falorni, A. Freddo, V. Iuliani, G. Toschi:
Current standard practice in EHV/HV Italian substation design:
Oriented modelling and simulation of lightning protection system for improving design criteria
14. Andreas Wuerl, Hans D. Betz, Kersten Schmidt, Wolf P. Oettinger:

Surveillance of Lightning Strokes Near Transmission Lines

15. M. Jaroszewski, J. Pospieszna, P. Ranachowski, F. Rejmund:
Modeling of overhead transmission lines with line surge arresters for lightning overvoltages
16. S. Vižintin, I. Kobal, M. Bečan:
The possibility of insulation level reduction on 110 kV overhead line with built-in post insulators using line surge arresters
17. Jorge Luiz De Franco, Craig Sutton, Carlos Riva, Jorge Tuesta Rivera, Jose Francisco Montes, Wilson Alonzo, Mussolini Tarazona, Manuel Contreras:

Experience of Tyco & Antamina in the Lightning Performance and Reliability Improvement of 220 kV Transmission Lines in Peru
18. Jorge Luiz De Franco, Jose Pissolato Filho:
Improvement of the transmission and sub transmission overhead lines lightning performance using line arresters – Experience in Brazil
19. T. K. Soerensen, J. Holboell:
Reduction of the visual impact of overhead transmission line systems through utilization of line surge arresters as lightning protection
20. L. Klingbeil, Z. Baus, S. Nikolovski, I. Ivanković:
Case Study for Application of Transmission Line Arresters on Croatian 400 kV Line along the Adriatic Coast Mountains
21. M. Puharić, M. Mesić, M. Lovrić, J. Radovanović, S. Sadović:
Lightning performance improvement of 110 kV line Ston – Komolac by use of line surge arrester
22. S. Sadović, T. Sadović:
Line surge arresters applications on the multi circuit overhead lines
23. T. Judendorfer, S. Pack, M. Muhr:
Line arrester application on a 110 kV high alpine overhead line to reduce lightning-caused outages
24. Stelian Alexandru Gal, Traian Fagarasan, Marius Oltean, Constantin Matea:
Romanian Field Experience In Mounting And Exploitation of Line Arresters On High Voltage Overhead Electric Lines
25. A. Haddad, H. Griffiths, M. Osborne:
Performance of parallel surge arresters
26. Volker Hinrichsen:
Testing Requirements and actual IEC Work on Transmission Line Arresters
27. Makoto Yamaguchi, Hiroki Kajino, Hiroki Saito, Shinji Ishibe:
Design Features and Performance of Gapped Transmission Line Arresters
28. Masaru Ishii, Hiroyuki Kado, Kazuhiko Shimoda, Kenji Tsuge, Katsuaki Komatsu, Makoto Yamaguchi, Hideto Watanabe, Takeshi Iwaida, Takehiko Akedani, Hirotoshi Kohno:
Lightning Protection of Overhead Transmission Lines with Surge Arresters – Development of Line Arresters and the Technology in Japan
29. Yoshihiro Ishizaki, Kenji Tsuge, Misao Kobayashi, Kunikazu Izumi:
Specific Consideration on Follow Current Interruption and Anti-pollution Performance of External Series Gapped Type Line Surge Arrester (EGLA)

30. P. E. Munhoz Rojas, C. L. da S. Pinto
Calculations of lightning-induced voltages in distribution lines with LSA
31. A. C. O. Rocha, L. V. Cunha, L. C. L. Cherghiglia, S. O. Moreira, D. C. Cunha
Application of line surge arrester on a 230 kV transmission line CEMIG's Experience
32. G. Berger
Lightning Phenomena and Related Accidents to Humans
33. A. Sekso, I. Sekso, J. Trbus
Line Arresters on Distribution Lines in Hilly Regions
34. A. A. Dellalibera, A. D. Andrade, A. C. Guara Bezerra, J. V. P. Duarte, P. M. B. Gois, R. L. Markiewicz
Brazilian production development of class 2 polymeric surge arresters for transmission line application (TLA)
35. G. V. Podporkin, E. S. Kalakutsky, V. E. Pilshikov, A. D. Sivaev
Lightning Protection Of Electric Power Overhead Distribution Lines by Long-Flashover Arresters in Russia
36. A. Borghetti, F. Napolitano, C. A. Nucci, M. Paolone
On the Mitigation Effect of Surge Arresters on the Lightning Performance of Overhead Distribution Lines
37. M. H. Shwehdi
Mapping Lightning Thunderstorms for Saudi Arabia for Better Selection of Ground wires and Lightning Arresters
38. S. Bojić, I. Dolić, A. Sekso, J. Radovanović, D. Škarica
First Experience in Monitoring of Line Surge Arresters Installed on 110 kV Transmission Line Ston – Komolac in Croatia
